

Intermediate Adobe Dreamweaver CS4

Two-Day Course

Windows and Macintosh

Course Overview:

This course is a continuation of the Dreamweaver CS4 Introduction course. It is an intensive, hands-on guided tour of producing a CSS based layout and website. You will explore in-depth techniques while working with external CSS pages such as designing a table-less layout, including creation of rollovers entirely in CSS. You will also learn how to create custom code snippets that will save you time by reusing the code, add interactive behaviors via JavaScript and start working with SPRY widgets! In addition, this course will cover some very useful techniques as well as explore some of the new features in Dreamweaver CS4 that will speed up your workflow.

Course Content:

- Use the Site Definition Advanced Mode to set up a site
- Controlling Layout with CSS
- Structuring pages with DIV tags
- The Box Model
- Understanding Floats
- Using Relative and Absolute Positioning
- Adding Form Interactivity
- Using SPRY Validation Widgets
- Creating a Dreamweaver Template
- Creating Editable Attributes
- Applying Templates to existing pages
- Behaviors Overview
- Getting more Behaviours
- Creating Rollovers with CSS
- Hiding and Showing Elements
- SPRY Overview
- Using SPRY Widgets
- Using Live View
- Creating Library Items
- Using Find and Replace
- Understanding Code View
- Photoshop Integration and Alternate Workflows
- Modifying Smart Objects
- Adding Flash Video
- Running Sitewide Reports
- Checking for Broken Links
- Validating Markup
- Updating and Publishing Sites
- Adobe AIR Authoring Support

Note: As of April 2009 DPA Communications will offer Adobe Acrobat, InDesign, Photoshop, Illustrator, Dreamweaver and Flash courses on version CS4 (Creative Suite 4). If you are currently using previous versions see the CS3 version of this course outline for any differences in training course content. Please contact DPA for more details or to have an instructor contact you.
