

Adobe Dreamweaver CS5 Specialist

One-Day Course

Windows and Macintosh

Course Overview:

This course is designed to give you expert understanding of Dreamweaver CS5 and its capabilities. You will build AJAX pages with the SPRY Framework, connect data sets to dynamic tables and work with XML and XSL files. An overview of building dynamic content through PHP will be covered as well. This course will also cover more in-depth techniques of turning a table based layout into a full CSS page as well as additional ways of extending Dreamweaver, such as installing and building a custom behavior, running reports, checking and validating links, cloaking and Design Notes.

Course Content:

- Extending CSS Templates
- Creating faux columns
- Enhancing layouts with background images
- Rounded corners via background images
