

# Adobe Photoshop CS4 & Adobe Fireworks CS4 for the web

One-Day Course

Windows and Macintosh

## Course Overview:

Get up to speed with the features in Adobe Photoshop and Adobe Fireworks that enable you to get the most out of your web images. Learn how to use the Save for Web & Devices feature in Adobe Photoshop, selecting appropriate file formats for particular image types, and how to best optimize those file formats. Then learn the how to use Adobe Fireworks to build web page elements and create and edit vector and bitmap images, or import and modify native Adobe Photoshop and Adobe Illustrator files. Apply effects, styles, and blend modes to add depth and character to text and symbols. Creatively design interactive layouts for websites and rich Internet applications. Export website comps to Adobe Dreamweaver software as standards-compliant, CSS-based layouts.

## Course Content:

- Using Adobe Photoshop's Save for Web and Devices feature
- An introduction to the Adobe Fireworks interface
