

Adobe Flash CS5 Video

Two-Day Course

Windows and Macintosh

Course Overview:

Find out the real power behind YouTube, Google Video, etc. Create immersive, rich media that fuses video with data, graphics and sound for dynamic interactive control. In this course you will create Flash video for the Web using new features such as alpha channels, filters, and other effects. Be at the forefront of this new and rich media technology platform. Please note this course is taught using ActionScript 3.0.

Course Content:

- Overview of Flash Video Formats (FLV & F4V & MOV & H.264)
- Connecting and Playing Flash Videos from a server (Progressive and Streaming)
- Adding Controls to the Flash Video Player
- Creating a basic Flash Video progress bar
- Showing Flash Video Progress
- Creating a Flash Video Scrubber
- Masking Video
- NEW CS5 Flash Video Playback Component
- Controlling Flash Video Playback Component
- Looping a Flash Video
- Applying Filters to create special effects on Flash Videos
- Using Alpha Video to maintain transparency of channels
- Data Binding Video
- Choosing Different Flash Video Scenes
- Creating and Using a Flash Playback Component
- Web Camera Object

Note: As of February 2011 DPA Communications will offer Adobe **Acrobat**, InDesign, Photoshop, Illustrator, Fireworks, Premiere, After Effects, Dreamweaver, Flash and Flash Catalyst courses on version CS5 (Creative Suite 5). If you are currently using previous versions see the CS4 version of this course outline for any differences in training course content.

Please contact DPA for more details or to have an instructor contact you.
