

HTML5 — Upgrade

One-Day Course

Windows and Macintosh

Course Overview:

The goal of this class is to provide you with a good working knowledge of HTML5, (the foundation language of web pages). You will learn the basic structure of an HTML document and to read and edit code directly, while learning the new content outline model and the latest HTML5 elements that power the latest release of this language – to have you understand what programs like Adobe Dreamweaver are actually doing. You will explore tags and attributes to format text, paragraphs, images, links, and buttons and focus on using the new HTML5 markup. By the end of this class you will create a web site complete with links, text and images, and receive a basic introduction to CSS.
