

Advanced Adobe Photoshop CS3

Two-Day Course

Windows and Macintosh

Course Overview:

Learn new design ideas and timesaving tips as you study tonal ranges, work with histograms and custom tables for colour separation. Designed for photographers and graphic arts professionals, in this course you will cover Photoshop's layer channels and paths capabilities.

Course Content:

- Coverage of Photoshop's general preferences
- Creating and modifying paths, creating a clipping path and using it with Illustrator or InDesign
- Channels Layers and Paths in-depth
- Creating special effects using layer masks
- Creating vector based shape layers
- Using the pen tool
- Creating text on a path
- Creating Layer Comps
- Working with custom shapes
- Colour: understanding colour modes
- Colour correction using curves and levels
- Adjustment layers for tonal and colour correction effects
- Combining a spot colour with a four colour separation
- Using the Liquefy tool
- Advanced layer and blending techniques
- Composing multiple images
- Working with smart objects
- Using the vanishing point filter
- Gradient capabilities

Note: As of January 1, 2008 all Adobe InDesign, Photoshop, Illustrator, Dreamweaver and Flash courses will be on version CS3 unless otherwise indicated. If you are currently using previous versions you can still benefit from attending this course.

Please contact DPA for more details or to have an instructor contact you.
