

Intermediate CorelDRAW X4

Two-Day Course

Windows

Course Overview:

After learning the fundamentals of CorelDRAW X4, you've discovered the limitless range of possibilities the program offers. In this course you will become proficient in manipulating objects, using the Object Manager, Colour Manager, Colour Harmonies and Distortion tools. A raft of special effects is covered in detail including PowerClips, Lens, Natural Pen Lines, extrusions, and blending. You will also learn how to manage bitmaps, create special bitmap effects, 3D text art, and import 3D objects.

Course Content:

- Using the Object Manager
- Working with layers to achieve heightened flexibility and control over drawings
- Creation and application of special effects including envelopes, extrusions, contours, PowerClips, Lens, Natural Pen Lines, and blends
