

# Introduction to Adobe\* Dreamweaver CS3

Two-Day Course

Windows and Macintosh

\* formerly Macromedia

## Course Overview:

Adobe Dreamweaver is the leading single most powerful tool for professional Web developers, as it allows you to easily build and manage dynamic animated Web sites complete with complex JavaScript functionality with the click of a mouse. This course will provide you with the technical knowledge and guidance to produce solid, well-designed and user friendly Web sites. You will use Dreamweaver's feature-rich interface to create tables, layers, style sheets, hyperlinks and buttons. In addition, learn to insert images and use the Code View Editor to create custom JavaScript functions and connect their activation to buttons.

## Course Content:

- About Dreamweaver and web design
- Getting to know Dreamweaver's interface
- Defining a Site Using the Site Wizard
- Adding and organizing Files and Folders in the Files Panel
- Inserting Text and formatting with basic block tags
- Editing the Font, Size and Colour of Text
- Testing pages in common web browsers
- Changing and Renaming CSS Rules
- Creating additional CSS Rules
- Understanding CSS's three rule types
- Defining a Custom CSS Style
- Applying a Custom CSS Style
- Editing CSS Styles
- Understanding redefined HTML tags
- Inserting a Table and selecting Table Elements
- Merging and Splitting Table Elements
- Formatting a Table
- Using CSS to control table content

# Introduction to Adobe\* Dreamweaver CS3

Two-Day Course

Windows and Macintosh

\* formerly Macromedia
